## Product Information

Flash column is a quick and (usually) easy way to separate complex mixtures of compounds. It is widely applied to organic compounds, natural products, biomacromolecule and any other active substances.

WelFlash Column New Design

### Features of WelFlash

- Available for all kinds of packing materials: SiO<sub>2</sub>, C18, Phenyl, CN, NH<sub>2</sub>, Hilic, SAX, SCX, Alumina
- Column size: 4g, 12g, 25g, 40g, 120g, 220g and 330g
- Particle size: 20~40µm, 40~70µm
- Luer-lok™ import and Luer™ export
- Maximum pressure: 14bar
- Good compatibility with most of FPLC systems, such as Isco®, Biotage®, Armen®

## Excellent Packing Technique

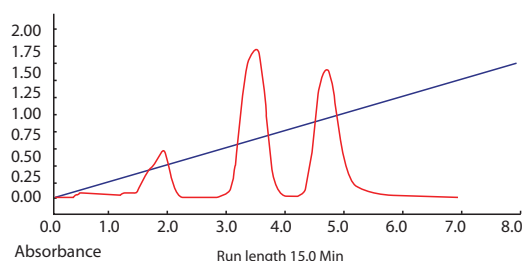

Fig.A: WelFlash Column(12g)

Fig.B: Flash Column(12g) of company S

Comparing WelFlash™ Column with S company's flash column at the same chromatographic conditions, one can find that WelFlash achieves baseline separation in shorter time.

## Comparison of Spherical Silica and Amorphous Spherical Silica

Fig. WelFlash Column: 40g Spherical Silica (20-40µm)

WelFlash Column: 40g Amorphous Silica (40-63µm)

Under same conditions, 40g Spherical WelFlash column can get baseline separation in a short time, but amorphous WelFlash cannot.

## Applications

1. Acetophenone 2. Methoxyacetophenone

1. Acetophenone 2. Methyparaben  
3. 4-amimobenzoic acid

1. Uracil 2. Tecnazene  
3. Phenol 4. Toluene

## Ordering Information
